BALDING BANKERS

Why Balding?

It's all about the numbers...

Since the start of 2020 Balding has saddled **3836 runners** in UK Flat (Turf) races... only 4 have saddled **more** than Balding (*Tim Easterby, Richard Hannon, Richard Fahey & David O'Meara*)... Balding has a much better overall S/R than that 4, however, as he operates at a 15% S/R whilst none of the other 4 are above 12%...

If we flip from number of runners to number of **WINNERS**... Balding has saddled **583 winners in UK Flat (Turf) races**... only TWO have saddled more winners than Balding (*William Haggas and Tim Easterby*)...

So... it's all about the numbers... and Balding gives a real chunky set of numbers to work with... added to that, he also kept appearing on my radar when I would do my daily digging into the numbers... looking for angles and systems to help with my constant 'narrowing the field' approach...

And that's what you'll find in this guide... **a bunch of profitable Andrew Balding angles you can profit from during the 2026 Flat season**...

As is always the case with an NTF guide, it is entirely up to yourself how you wish to utilise the information and how you wish to add it to your own punting methods...

Ben (NTF)

W&P 99/237 | 42% S/R**
32% above exp | E/W returns = +£111.07

Summary...

This guide is not an exhaustive coverage of the Balding yard... given the numbers he has at his disposal there are many different ways you could slice and dice his string to uncover profitable angles... the angles in this guide *are*, however, the angles I've personally been using/uncovered (a couple I uncovered in the 'off season' during some research I was undertaking) and I'll be using them for my betting/analysis throughout the 2026 Flat season (and beyond)...

Mainly I use these types of angles to help with my overall analysis, and qualifiers will appear in my [NTF OMS Guides](#) throughout the duration of the **NTF 2026 Summer Members Service...**

You could, if you so wished, follow the angles blind and simply back all qualifiers (you would need [a database such as HORSEBASE](#) to plug in the angles and pick up the qualifiers easily), most of the angles in this guide have been profitable year upon year (some, naturally, will dip into a loss occasionally)... that isn't *my* preferred method for these specific angles, but, as always, how you make use of a FREE NTF Guide is entirely up to yourself...

Many thanks for taking the time to read this FREE NTF Guide, hopefully you found the information contained within the pages beneficial 😊

Cheers – **Ben (NTF)**
